TITLE - Digital Art Commission Portal

DELIVERABLES

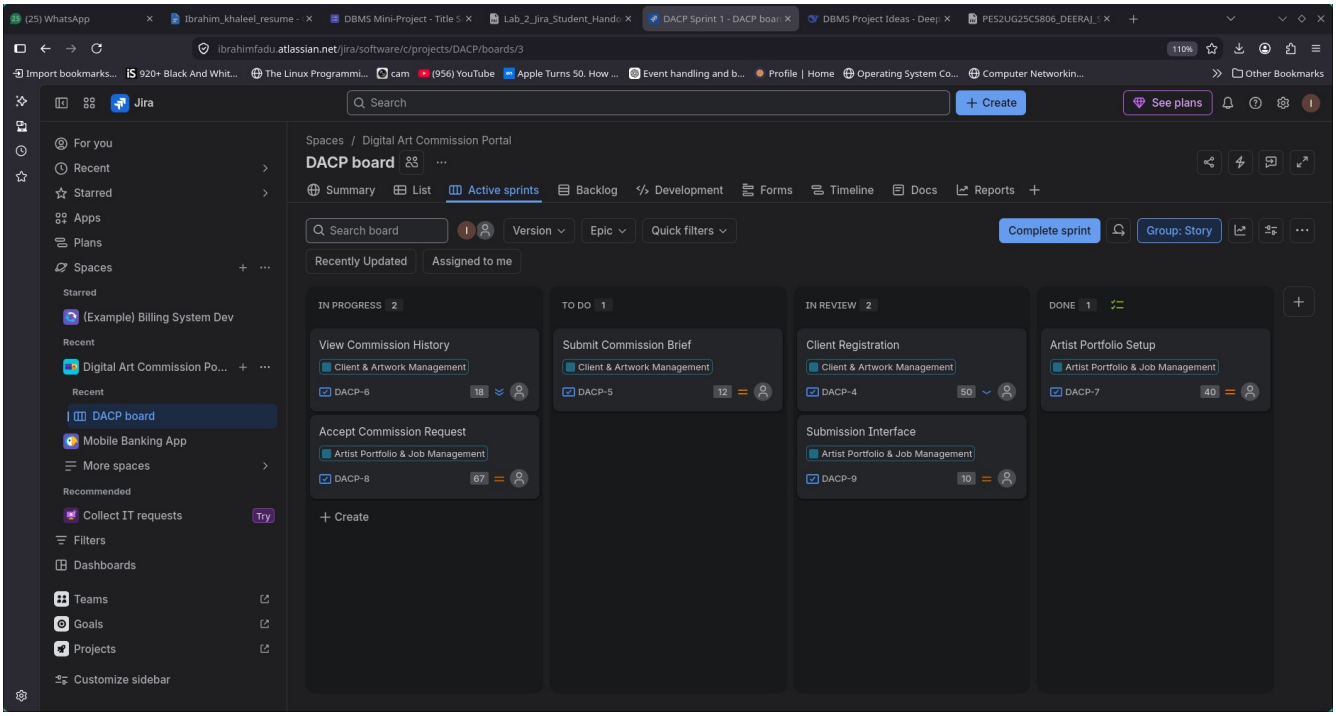

1. Jira Backlog with Epics & User Stories

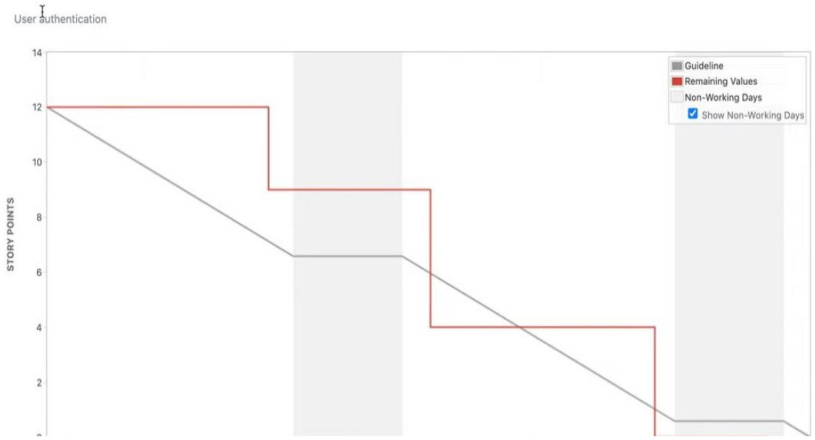

2. Story Point Assignments

3. Sprint Board / Active Sprint View

4. Burndown Chart

5. Brief Reflection Document answering the 4 reflection questions:

i. Did your estimations reflect the actual effort?

Yes, the story point estimations were reasonably close to the actual effort required. The Fibonacci scale helped us differentiate between simple, moderate, and complex tasks.

ii. Was your backlog well-prioritized?

Yes, the backlog was prioritized based on the importance of each feature to the users and the overall functionality of the system. High-priority features were planned earlier in the sprints.

iii. How did your simulated sprint align with your plan?

The simulated sprints generally followed the planned backlog and allowed us to track the progress of the selected user stories from To Do → In Progress → Done.

iv. What insights did the burndown chart give about your team’s capacity?CommentHighlight

The burndown chart helped us understand how quickly work was being completed during the sprint. It also showed the remaining workload and helped evaluate the team's progress and capacity.
